A sensitive B senseless C sensible D insensible

Ex. 2. What are your favourite Websites? Why?

- **What do you use them for?**

	The biggest social media network on the net in number of users(more than 1,6 billion active users)
	The most popular social media site for professional networking(available in 24 languages)
	The largest and most popular video-based website
	The platform which consists of digital bulletin boards where businesses and ordinary people can pin their content.
	One or the most popular social networks where one can post info about travel, fashion, food, using unique filters and editing
	a mobile messaging application used to share photos, videos, text, and drawings. It has become hugely popular in a very short space of time, especially with young people. Messages will "self-destruct" in 10 seconds.

Fill in the table with 5 most visited Websites and the purposes people use them for.

The 5 most visited Websites	The purposes people can use them for
------------------------------------	---

1.	
2.	
3.	
4.	
5.	

1. Have you ever created a website?
2. What people need for this?
3. What is the meaning of “Website”?

Ex.3 Put the words into the right places in the sentences.

1. personal website
2. government website
3. software
4. Microsoft's IIS
5. Netcraft
6. hosted
7. non-profit organization
8. Apache
9. web server
10. user agent

Websites have many functions and can be used in various fashions; a website can be a _____, a commercial website, a _____ or a _____ website. Websites can be the work of an individual, a business or other organization, and are typically dedicated to a particular topic or purpose. Any website can contain a hyperlink to any other website, so the distinction between individual sites, as perceived by the user, can be blurred.

Websites are written in, or converted to, HTML (Hyper Text Markup Language) and are accessed using a _____ interface classified as a _____. Web pages can be viewed or otherwise accessed from a range of _____-based and Internet-enabled devices of various sizes, including desktop computers, laptops, PDAs and cell phones.

A website is _____ on a computer system known as a _____, also called an HTTP server. These terms can also refer to the software that runs on these systems which retrieves and delivers the web pages in response to requests from the website's users. _____ is the most commonly used web server software (according to _____ statistics) and _____ is also commonly used. Some alternatives, such as Nginx, Lighttpd, Hiawatha or Cherokee, are fully functional and lightweight.

Домашнє завдання:

1. Вивчити нові слова по темі.

2. Read the text, outline the pros and cons of using Instagram.

Instagram not only connects users with each other, but it links to existing social accounts, including Facebook, Twitter and Flickr so that photos from Instagram can be shared directly with these accounts. Teens prefer Instagram because they can follow the friends they care about, and avoid the bulk of sponsored posts and random content that appear on the feeds of sites like Facebook. For many teens, Instagram functions as a “digital diary” they can share with their closest friends. These aren’t random moments, however: those are for Snapchat. Instagram is for the best photos that present a teen in the best light — the most flattering selfies, the coolest things they’re out doing or eating. This of course has its dark sides, as no likes or negative comments can lower a teen’s self-esteem. It can also be a factor to screen addiction – which should be a serious concern for all parents, given that 14 percent of all Instagram users report checking their account while driving.

Instagram leaves the door wide open for teens to share too much personal information, including full first and last name, age, gender, email address and phone number. Similarly, geo-tagging — one of the most popular Instagram features — can reveal your teen’s location, and the exact spot that a picture was taken. Instagram is filled with teenagers who share photos and make comments in groups. It is, therefore, a platform that is ripe for gossip and harassment. Since it is online, the bullying can follow children home from school and leave them with no safe place. Young girls are especially at risk. The most common form of Instagram bullying is simply posting embarrassing or humiliating photos of the victim, which the victim would clearly not want made public.
