Група №15

Урок № 42

Тема уроку: **MODERN COMMUNICATION TECHNOLOGIES**

Мета уроку: вдосконалювати лексичні навички й навички вимови, аудіювання, читання й усного мовлення; розвивати логічне мислення; виховувати правильне ставлення до користування комп'ютерами, а також загальну культуру учнів.

Матеріали уроку:

(Watching flash video about modern communication technologies)

(<https://www.youtube.com/watch?v=oKQ03sr6ryo>)

Do you agree with the words of Bernard Shaw:

“Progress is impossible without change, and those who cannot change anything.”

Revising vocabulary

Computers have become a vital part of everyday life. What is a computer? A computer is an electronic machine which can be used to store, process and display data. Now I'd like you to revise the parts of the computer doing a small test. Please, use the site Learningap.com, find the game “Parts of a computer”.

Game “The advantage of computers” (<http://learningapps.org/1821647>)

Коротко законспекуйте переваги використання комп'ютера.

The Advantages of Computers

1. People can communicate with each other instantly by email.
2. Many people now work from home using a computer. (I'd go along with that it is very convenient especially when you have some problems with

your health)(The problem's that you don't have alive communication with other people)

3. Many people use the computer in their leisure time for playing game or just surfing the net.(You've got a point there and I think If you want to relax you can use such form of it.)(I don't think so. 'Cos it is a waste of time instead to have relax outdoors with you family)
4. You can buy almost everything on the Internet without having to leave your home. (I think so, too. It is great convenience.) (Not sure. You can buy spoilt things)
5. Some people became addicted to the Internet and computer. (We agree on that. This is a big problem nowadays)

Read the article and choose the best answer (a-c)

THE INTERNET: HERE TO STAY

Most people today cannot imagine their life without the Internet. I believe it is one of the most important motivations. Thanks to the World Wide Web, our lives have become easier and more exciting.

First of all, the Internet helps us find information easily. For example, we can read the news and find answers to the questions 24 hours a day. In addition, we can use the Internet for entertainment. We can send e-mails to friends and shop online. We can even listen to the latest music and watch live sports events from other parts of the world.

However, some people argue that the Internet has a negative effect on society. Internet users become less sociable. They stay at home most of the day instead of going out to shop, work and meet friends.

In my opinion, the Internet has more advantages than disadvantages. Our lives are better with it and I hope it is here to stay.

- 1) Most people nowadays ...
 - a) cannot live without the Internet
 - b) imagine their lives without the Internet

c) think without the Internet

2) Thanks to the World Wide Web, our lives have become...

a) difficult and more stressful
