### The Climate of Great Britain

In Great Britain it is never too hot or too cold for work or play in the open air. The sea keeps the island warm in winter.

The winds have also very much to do with weather in Great Britain. Winds from the Atlantic are wet and warm. They bring plenty of rain to the island. The east and north-east Winds are cold and dry.

Thanks to the mild climate there are a lot of evergreen plants in Great Britain. But the lack of sunshine is the reason why the cultivation of grain crops is difficult.

Grass grows all the year round.

The weather changes very often. In spring sunshine and showers follow each other often during the day.

In spring the weather is generally mild, the summer is not so hot as on the continent.

In winter sometimes it rains and sometimes it snows, and they also have fog and frost. The rivers and lakes are seldom covered with ice.

But the worst thing about the climate in Great Britain is the thick fog they so often have in autumn or winter.
