Група №31

Урок №23-24

Тема уроку: «We are afraid of smoking. Control Work.»

Мета уроку: Ознайомлення з новою лексикою теми, сприяти розвитку в учнів умінь ввічливо висловлювати власні переконання, думки, згоду й незгоду, використовуючи для цього необхідний лексико-граматичні знання. Формування навичок читання та усного мовлення. Провести контроль знань.

Матеріали уроку:

1. Перепишіть лексику теми та перекладіть і вивчіть слова.

Smoking, tobacco, cigarette , lungs, cancer, nicotine, breath , emphysema, throat, vision , blood vessels , blood clots, cholesterol , heart disease , diabetes , pregnancy , bronchitis, coughing, irritability, kidneys.

Візуальне супроводження нових слів

lungs

breath

throat

vision

blood vessels

blood clots

coughing

irritability

kidneys

2. Прочитайте фрази та перекладіть усно.

Smoking is a terrible thing.

There's nothing good about it.

I don't know how cigarette companies can advertise their products.

Cigarettes kill people.

Smoking is not cool.

Last century, cigarette companies tried to make people think it was.

They even told people that cigarettes were good for your health.

How ridiculous.

Everyone today knows that smoking is one of the least cool things you can do.

Unfortunately, cigarette companies are doing a good job of selling their products to children.

Smoking is on the increase in countries like China and pretty much all over Africa.

This is sad.

Once people get enough information about the dangers of smoking, perhaps millions will quit this terrible habit.

3. Оберіть 5-7 речень (вплив куріння на організм) та запишіть

The Effects of Smoking on the Body

1. Mood stimulation: That surge of energy is due to a nervous system stimulant, which can also make you addicted. If you're under a lot of stress, it'll take more to get more
2. Poor vision: Smoking may be the reason you don't see as well as you used to.
3. Appetite Suppressant: Your sense of smell and sense of taste can be dulled by smoking, which may affect your appetite
4. Irritability and anxiety: If you missed your cigarette break, or if you're trying to withdraw, you might find yourself a bit on edge
5. Coughing: All that tobacco smoke can make you cough, but it doesn't effectively clear your lungs
6. Cold and flu: Smokers experience more colds and flus than nonsmokers do
7. COPD: Chronic obstructive pulmonary diseases are more common in smokers
8. Lung cancer: Smokers are more likely to develop lung cancer than nonsmokers are.
9. Bronchitis: Smokers aren't the only ones who have a higher rate of bronchitis. Children of smokers do, too
10. Constricted blood vessels: Nicotine causes blood vessels to tighten and restricts blood flow. That's bad for your heart and your brain.
11. Too much clotting: Blood clots increase risk of heart damage and stroke
12. High cholesterol: Tobacco smoke steals your good cholesterol and makes it more likely that your bad cholesterol will build up.

13. Blood cancer:Smokers are more likely than nonsmokers to develop cancers of the blood .
14. Heart disease:Smokers and nonsmokers who are regularly exposed to secondhand smoke are at risk of heart attack and heart disease
15. Yellow fingers:Those yellowish fingers and fingernails come from handling tobacco products over many years
16. Stained teeth:Yellowish or brownish stains on the teeth are telltale signs of long-term smoking.
17. Wrinkly skin:All that smoke in your face causes your skin to age prematurely.
18. Smelly hair:Just being around a smoker can make your hair smell of smoke .
19. Diabetes complication:Smokers are at risk of developing type 2 diabetes. Diabetes tends to progress more rapidly in smokers than in nonsmokers .
20. Cancer connection:Smokers have a higher rate of certain cancers, including cancer of the mouth, throat, and kidneys.
- Bad teeth:Smokers may develop infection or inflammation of the gums, which can cause tooth decay and tooth loss.
- Problems with pregnancy:Smoking during pregnancy can cause a lot of problems for both mother and baby.
- Infertility:Male and female smokers are more likely than nonsmokers to have fertility issues
- Early menopause:Female smokers tend to enter menopause earlier than nonsmokers
- Cervical cancer:Women who smoke raise their likelihood of developing cervical cancer
- Problems with newborns:Having a mother who smokes during pregnancy puts a baby at higher risk for health problems

4. Поєднайте фрази та їх переклад (цифра-буква)

- | | |
|---|--------------------------|
| 1. It impairs your vision | a) воно викликає задишку |
| 2. It takes your breath away
грошей | b) це марнування часу та |
| 3. It causes lung cancer and cancer of the throat | c) ваші зуби та пальці |

жовтіють і шкіра

ВИГЛЯДАЄ ЖАХЛИВО

4. It turns your teeth and fingers yellow and gives you ugly skin d) від вас тхне, як від старої попільниці

- 10) If you _____ (win) the first prize, you'll get a holiday in Rome.

6. Напишіть коротке повідомлення про шкodu пасивного куріння (8-10 речень) ,чи згодні Ви з наступними висловлюваннями ,та яккинути палити

Passive smoking is the inhalation of smoke, called second hand smoke or tobacco smoke from tobacco products used by others. Innocent people's lives are put to illness and danger.

Passive smoking worsens the effects of middle ear infections, asthma, bronchitis and pneumonia in children. Protect children. Don't make them breathe cigarette smoke.

Passive smoking worsens the heart disease , stroke, lung cancer and nasal cancer in adults. She will die from a passive smoking related disease in fifteen years time.

Passive smoking kills your dearest one's first. If not for yourself then for your loved one's.

Увага! Фото виконаної класної роботи та домашнього завдання надсилати на електронну адресу викладачів згідно розподілу групи на підгрупи

Карнах Емілія Віталіївна – emiliya.karnakh@gmail.com

Росоха Наталія Миколаївна - nataross2017@gmail.com

У темі листа вказувати Ваше ПІБ, № групи, назву предмета, номер уроку.

Конспекти надсилаємо протягом 2-3 дні з моменту виставлення уроку на сайт училища!!

Учні котрі не надсилають конспекти

взагалі будуть Н/А !!!
